

Inclinometer casing

TYPE ABS-60 QL

The ABS-60 QL inclinometer casing has four internal grooves and an integrated connection socket. It serves as a guide tube for driving an inclinometer probe or installing an in-place inclinometer. The connection socket of the ABS-60 QL (Quick Lock) makes it easy to quickly connect two tubes. Once the tubes are plugged together, all you have to do is insert a securing wire and the connection is complete.

TECHNICAL DATA

| | |
|--------------------------|--------|
| Material: | ABS |
| Length of each tube: | 3 m |
| Outer diameter tube: | 70 mm |
| Inner diameter tube: | 60 mm |
| Weight tube: | 3 kg |
| Length of coupling: | 105 mm |
| Outer diameter coupling: | 76 mm |
